CAREER OBJECTIVE

Artificial Intelligence graduate with hands-on experience in machine learning, deep learning, neural networks, computer vision, and data analysis. Skilled in Python and experienced in developing practical AI solutions and applications. Strong problem-solving mindset with a focus on building intelligent systems and contributing to innovative AI engineering teams.

EDUCATION

Bachelor Of Artificial Intelligence,
University of Hail

(2021-2026)
Hail, Saudi Arabia

EXPERIENCE

Data Analytics & Software Development Intern

(Jun 2025 – Jan 2026)

Center of LEGAL Studies & Research

Riyadh, Saudi Arabia

- Led the end-to-end development of a full-stack Procurement Dashboard, from data cleaning and database design to backend API development and frontend implementation.
- Cleaned, transformed, and analyzed procurement data using Python, Pandas, and NumPy to generate actionable insights for supply chain and finance decision-making.
- Designed and implemented the application database and developed RESTful APIs using C#/.NET for business logic, data validation, and system integration.
- Developed the complete React.js frontend, including interactive charts, dynamic filters, KPI dashboards, and procurement data exploration.
- Built an integrated data pipeline connecting the data processing, database, backend API, and frontend layers.
- Implemented exportable analytical reports and dashboards to support procurement teams and management.
- Used GitHub for version control, branching, code reviews, and collaborative development.

PROJECT

AI-Powered Safety Monitoring System for Construction Sites

- Developed a real-time computer vision safety monitoring system using YOLOv8n, Python, Streamlit, OpenCV, and SQLite to identify construction-site safety violations.
- Integrated a deep learning object detection model capable of detecting workers and multiple safety-related classes, including helmets, safety vests, masks, and other violations.
- Led the development of the system's backend, database, and frontend, integrating AI detection results into a complete monitoring application.
- Designed and implemented the SQLite database for storing safety alerts, detection records, camera status, and historical data for reporting and analysis.
- Developed an interactive Streamlit dashboard with live camera detection, violation alerts, compliance KPIs, site insights, reports, and evidence tracking.
- Implemented real-time video processing using streamlit-webrtc, including confidence filtering and alert throttling to improve performance and prevent duplicate records.
- Achieved 92.1% precision, 88.7% recall, 90.4% mAP@50, and 75.6% mAP@50-95 on the trained YOLOv8n model.

COURSES AND CERTIFICATION

- Supervised Machine Learning: Regression and classification
- Advanced Learning algorithms
- Unsupervised Learning, Recommenders, Reinforcement Learning
- Datacamp - Data Manipulation with pandas
- Datacamp - Exploratory Data Analysis in Python

SKILLS

- Programming: Python, C, C#
- AI & Machine Learning: Machine Learning, Deep Learning, Neural Networks, Computer Vision, Object Detection
- AI/ML Tools: YOLOv8, OpenCV, Pandas, NumPy
- Data & Analytics: Data Analysis, Data Cleaning, Data Preprocessing, Data Visualization, SQL
- Backend & APIs: C#/.NET, RESTful APIs
- Frontend & Applications: React.js, Streamlit, streamlit-webrtc
- Databases: SQLite, PostgreSQL, MySQL, Oracle Database
- Tools: Git, GitHub
